

## What can it do?

- Control unit information
- Read & clear Fault Codes
- Reset service reminders
- View live sensor values
- Log & graph live values
- Component function test
- Component calibration
- Adaptation reset & relearn
- Basic coding
- Bleed tests
- Many, many more

## Who uses it?

- Professional workshops
- Motorcycle owners
- Expedition riders

## Functionality Modes

**Service Functionality** is accessed through the GS-911 Windows PC application. This includes the resetting of Service Reminders, output Function Tests, device Calibration, clearing and relearning of Adaptations, ABS Bleed tests and many more.

**Cloud Functionality** is introduced in a staged manner, aiming to provide the same Service Functionality that is found within the Windows PC app, on any platform (MAC, LINUX, iOS & Android etc.)

**Emergency Functionality** is embedded into the GS-911wifi unit. It allows the user to view the ECU information, Read and Clear Fault Codes on ALL control units as well as viewing Real-time Live sensor data for ALL Engine control units.

# 2 RIDE THE WORLD

"As important as your keys on expeditions."

100% recommended by Simon & Lisa Thomas over 520 000km.

Now for everyone.

## Scan your bike with wifi.

Imagine browsing your bike's electrical systems like any website. The GS-911wifi plugs into your bike and is accessed over wifi. That means it works on your phone, tablet or PC. Anytime. Anywhere.
